

SECURE DATA ERASURE SOLUTIONS

Data erasure is a software-based method of overwriting and destroying all electronic data residing on a hard disk drive or other digital media. Permanent data erasure goes beyond basic file deletion commands, which only remove direct pointers to the data disk sectors and make the data recovery possible with common software tools. Unlike degaussing and physical destruction, which render the storage media unusable, data erasure removes all information while leaving the disk operable, preserving IT assets and the environment.

Standards

- > DoD 5220.22-M 3 pass & 7 pass
- > NIST SP-800-8 & NIST Enhanced
- > CESG Baseline and Enhanced (May 2011)
- > US Army AR380-19
- > US Navy NAVSO-P5239-26
- > Russian GOST R 50739-95
- > VSITR (Germany)
- > Canada CSEC ITSG-06
- > SEAP
- > CESG CPA
- > BSI-2011-VS
- > NATO
- > ISO 14001 & 9001

How we work - the Agilitas difference

Drives are received and stored in a locked secure room until they are processed, they are then erased in our secure access controlled workshop. (Only authorised personnel can gain access).

Once the drive has been erased and verified it is processed through our managing system and returned via a reputable courier of choice.

Cost

1-99 drives	£10 each
100+ drives	£6 each
Return carriage included	

CoD

- > Electronic certificate of destruction – Available on request

Turnaround time

- > 1-3 working days from receipt (depending on quantity)
